Extended Warranty Policy Outline

The limited policy outline below is intended as a guide and additional requirements for specific projects may apply.

Project Requirements

- Project orders must exceed 250 units
- Material invoices and warranty fee must be paid in advance, at time of order
- Job Start may be required. All travel related expenses will be estimated and paid for in advance plus 20%. Final invoices or credits relating to technical services will be addressed upon completion of the project.
- Final inspection is required and all punch list items must be completed prior to installation of the solar modules. If module installation is to occur simultaneously with the installation of the U-Anchor making the U-Anchor inaccessible, an authorized observer may be required during installation. All travel related expenses and labor will be estimated and paid for in advance plus 20%. Final invoices or credits relating to technical services will be addressed upon completion of the project.

Contractor Requirements

Contractors must

- be a legal contractor where the project is located.
- be an authorized contractors in good standing with the brand and type of roofing installed on the roof.
- be an authorized U-Anchor installer in good standing with Anchor Products and or your Anchor Products distributor.
- be able to show competence in working with the given roofing material(s) on the project to the satisfaction of Anchor Products.
- demonstrate proper installation methods of the U-Anchor being installed
- carry liability insurance in access of 1 million dollars with an umbrella in access of 2 million.

Extended Warranty Fee

Extended warranty fees are by quote only
