

COUPLING NUTS-3/8"-16 x 2"

Description

Hex Coupling Nuts are defined by their elongated hexagonal shape and used to connect two pieces of threaded material at opposite ends. Hex coupling nuts are made to be highly enduring and able to suit the wide variety of applications they are commonly used for.

Features and Benefits

- Allows for various custom heights of the U-Anchor bolts.
- Right hand thread
- Coupling nuts are threaded fasteners for joining two male threads, most commonly threaded rod
- Coupling nuts are used to make up long rod assemblies from shorter lengths of rods
- Stainless steel

Product Specs

- ACQ Rated Fastener
- Fastener Callout Size: 3/8-16
- Fastener Thread Type: Coarse
- Fastener Type: Rod Coupling Nut
- Finish Family: Stainless Steel
- Material: Stainless Steel
- Measurement Standard: USS
- Thread per inch: 16
- Length: 1-3/4"
- 5/8" Wrench

Options and Packaging

- 3/8" - 16 x 1-3/4" Coupling Nut: 10/pk
