

Description

This split lock washer provides a circular bearing surface with offset split ends which help bite into the mating material to provide a locking feature when tightened beneath a nut. It is round with a hole in the center and can be used where loosening is a concern. Used in applications with like nuts and bolts of similar diameter as well as screw products.

Features and Benefits

- Stainless steel construction
- Stainless steel finish

Product Specs

- ACQ Rated Fastener
- Fastener Type: Split Lock Washer
- Finish Family: Stainless Steel
- Material: Stainless Steel
