

Description

Adding a flange to the standard hex nut greatly increases the load bearing surface. Fantastic for protecting the substrate in high torque applications. Hex flange nuts spread the load to meet your challenging fastening assembly. These Hex Nuts are internally threaded and have a hex drive for nearly all general applications. Made of high quality stainless steel which offers a high level of chemical and corrosion resistance.

Product Specs

- ACQ Rated Fastener
- Fastener Thread Type: Coarse
- Fastener Type: Flanged Hex Nut
- Finish Family: Stainless Steel
- Material: Stainless Steel
- Measurement Standard: USS
- Package Quantity: 10
- 9/16" wrench

Options and Packaging

- Stainless Steel Nut - 1/2" - 13 Threads/Inch - 10/pk
- Stainless Steel Nut - 1/4"-20 Threads/Inch - 10/pk
- Stainless Steel Nut - 3/8" -16 Threads/Inch - 10/pk
