

## Overview

The electrical box system is one of the most essential, if not THE most essential, utility necessary for daily operations. The safety and stability of this mission critical equipment is an important aspect to consider for your commercial roof. **The AP Solution™ EBK 0920** Electrical Box - Wall Mount Securement offers you a more secure and longer lasting mount for your system. The electrical box securement provides commercial building owners with a safe, efficient, and more easily maintained installation method. Installation of the mounting system is allowed and accepted by all major North-American roofing manufacturers.

The U-Anchor 2000 Series attachment by Anchor Products provides exceptional strength, which can help your equipment to be held down with unmatched strength against natural events. When Installed correctly, the U-Anchors and EBK 0920 solution, will perform as designed, remaining permanently secured and watertight for the life of the roof.

## Features:

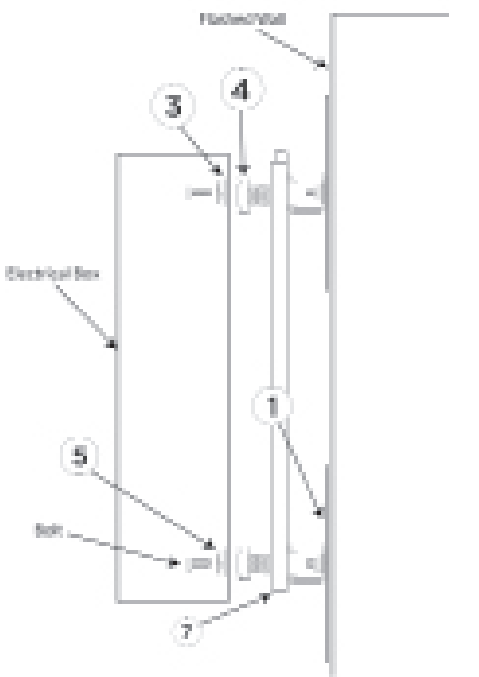

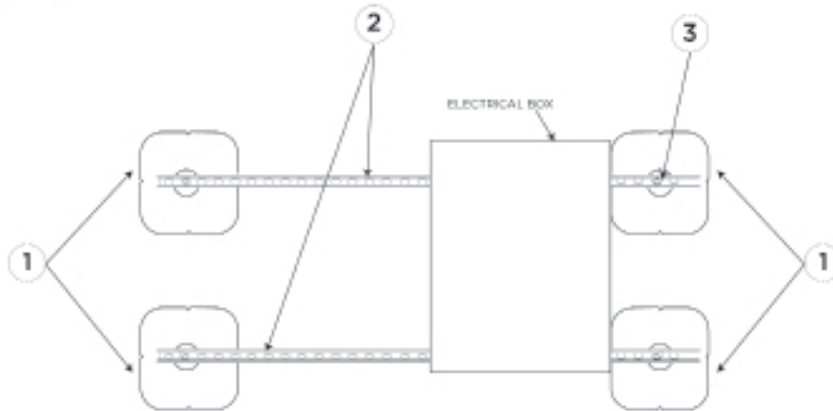

- The system uses U-Anchor™ 2000 Series attachment
- U-Anchor is allowed and accepted by all major North American roofing manufacturers maintaining all roof warranties
- Each U-Anchor 2000 Series attachment can resist approx. 3000 lbs. in tension and 4000 lbs. in shear
- Attaches safely to TPO, PVC, EPDM, Asphalt and coated roofs without damaging the roof.
- Exposed components made of stainless steel, aluminum, and other non-corrosive materials.

*ASCE 7-16 code requires all rooftop equipment to be bolted, welded, or otherwise positively fastened without consideration of frictional resistance.*

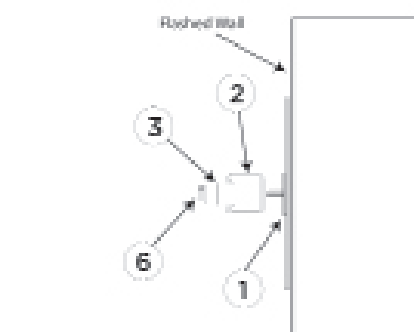

The U-Anchor 2000 Series attachment by Anchor Products provides exceptional strength to your system and enables it to be held down and fight against in case of any extreme natural events.
