

## Overview

Finding the right solution for your duct, pipe and cable tray system is critical to the development and maintenance of your commercial roof.

An Attached H-Frame could enable you to uphold your system at the necessary height.

**The AP Solution™ HFR 0631 Attached H-Frame Securement System** provides the strength and secured mounting desired for your rooftop equipment.

The **H-Frame System** is engineered to ensure component capacities and deflection criteria are not exceeded. The U-Anchor 3000 series attachment enables the system able to withstand strong winds and other natural events.

Respected third party engineers have tested and approved the Attached H-Frame System. The U-Anchor attachment is accepted by all major North American roofing manufacturers.

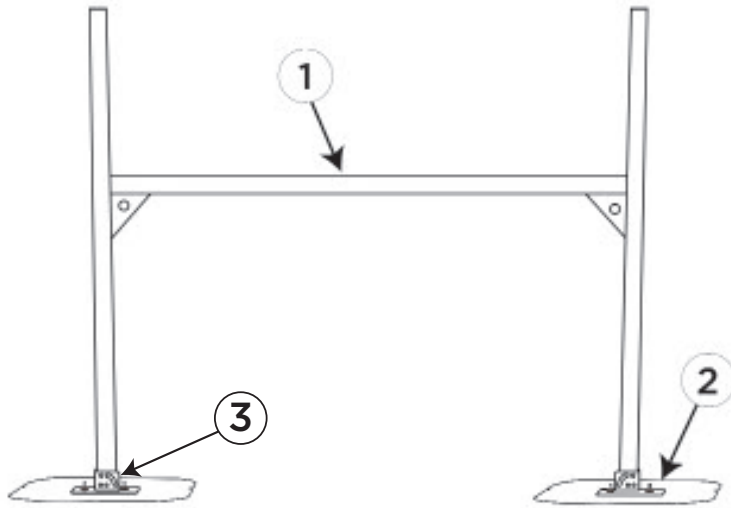

## Features:

- **Attached H-Frame Securement System** designed for support and anchorage.
- U-Anchor provides you with a stable securement that can withstand high winds, seismic conditions and other natural hazards.
- Attaches safely to TPO, PVC, EPDM, asphalt and coated roofs without damaging the roof with the U-Anchor.
- All exposed components and hardware are stainless steel, aluminum, or other non-corrosive materials.
- Metal parts consist of aluminum or hot dipped galvanized.

### Optional Accessories:

- Load management plate.

*ASCE 7-16 code requires all rooftop equipment to be bolted, welded, or otherwise positively fastened without consideration of frictional resistance.*

*Attached H-Frame Securement*
