

ESS 0670

EXHAUST SYSTEM SECUREMENT

The AP Solution **ESS 0670 Exhaust** and/or ventilation securement solution facilitates your need for a securely mounted system and follows the unique requirements specified by your local building code and standards.

Your building's exhaust system is one of the most critical parts of your rooftop systems. They system ensures that your building is properly releasing all the heat fumes, moisture, and odors that become trapped in your commercial building while also providing improved air quality for your occupants and guests.

The Exhaust System Securement is attached using our U-Anchor 2000 Series Attachments, providing exceptional strength to hold your system in place. When Installed correctly, the U-Anchors and ESS 0670 solution, will perform as designed, remaining permanently secured and watertight for the life of the roof.

HVAC SYSTEMS SECUREMENT

ASCE 7-16 code requires all rooftop equipment to be bolted, welded, or otherwise positively fastened without consideration of frictional resistance.

FEATURES:

- » Each U-Anchor 2000 Series Attachment can resist approximately 2,500 lbs. in tension and 4,300 lbs. in shear.
- » System attaches safely to TPO, PVC, EPDM, asphalt and coated roofs without damaging the roof surface.
- » All exposed components and hardware are stainless steel, aluminum, or other non-corrosive materials.
- » Cables come standard at 10', but are available in custom lengths as well.

ADVANTAGES

- » Safely attaches to TPO, PVC, EPDM, asphalt and coated roofs.
- » System installs easily with less manpower and can be installed year round.
- » Most secured non-penetrating attachment for your roof as opposed to the industry standard methods.
- » The U-Anchor attaches without damaging your roof surface.
