

HTD 0640

HVAC TIE-DOWN SECUREMENT

AP Solution **HTD 0640 HVAC Tie-Down** secures your rooftop unit to the structure. Tie-downs can be installed with the system or retrofitted as needed.

Winds as light as 50-60 mph can dislodge your outdoor unit from its base, causing damage to the unit and your roof. The HTD 0640 protects your unit from damage and prevents costly repairs.

The U-Anchor™ 2000 Series Attachments by Anchor Products have proven effective in securing HVAC equipment in harshest conditions caused by earthquakes or hurricanes.

HVAC SYSTEMS SECUREMENT

ASCE 7-16 code requires all rooftop equipment to be bolted, welded, or otherwise positively fastened without consideration of frictional resistance.

FEATURES:

- » Attaches safely to single-ply, asphalt and coated roofs without damaging the roof using a U-Anchor 2000 Series Attachment.
- » The ultimate force resistance of each 2000 series U-Anchor is approximately 2,713 lbs. in tension and 4,339 lbs. in shear.
- » The 3/16" stainless steel 7x19 aircraft cable offers a breaking strength of approximately 3700 lbs. (Other wire rope options available upon request.)
- » The U-Anchor can be used with all HVAC Equipment.
- » All exposed components and hardware are stainless steel, aluminum, or other non-corrosive materials.

ADVANTAGES

- » Quick and easy install.
- » Stainless steel straps and cables ensure that the metal will not corrode or deteriorate in the harshest of environments.
- » The HVAC Tie-Down Securement using the U-Anchors will not void the roof warranty.
