

LPS 0400

Lightning Protection

The LPS 0440 Lightning Protection by Anchor Products is a securement solution to safely and effectively secure the air terminals and the cable clamps on the roof. The U-Anchors are considered lightning protection attachment accessories or fittings, not lightning protection components and are not required to be tested under UL 96.

The U-Anchor is available for all commercial types such as TPO, PVC, KEE, EPDM, SBS, APP, Roof Coatings and more. Our system uses brand-specific pre-flashed components, making installation significantly easier and provides more consistent performance. The U-Anchor can be secured to low slope roof surfaces, vertical parapet walls and anything in between to exceed code requirements for wind and seismic events. Additionally, U-Anchors are included in most roof manufacturers' leak protection warranties.

ASCE 7-16 code requires all rooftop equipment to be bolted, welded, or otherwise positively fastened without consideration of frictional resistance.

FEATURES:

- » Provides permanent wind and seismic resistance for the roof assembly
- » Brand-specific waterproofing components
- » Non-penetrating attachment
- » All exposed hardware is stainless steel
- » U-Anchor Air Terminal Base Securement or a U-Anchor Cable Clamp Securement comes standard with a 1/2"-13 stainless steel bolt or a 1/4"-20 stainless steel bolt.

Note: Cable clamps and extension nuts are provided by the lightning protection equipment provider.

ADVANTAGES

- » Included in most roofing manufacturers' leak protection warranties when installed in accordance with roof manufacturer installation instructions
- » Corrosion Resistant Hardware
- » Brand-specific flashing to match existing roofing system types, brands and colors
- » Typically installs in less than 5 minutes

Note: See the list of roof manufacturer Alliance Members for specific warranty information.
